

## Aloha to our first directors

*Graham Odgers (standing) and Roger Cayrel shortly before their departure in August.*

Roger Cayrel and Graham Odgers have left the Corporation and bid farewell to Hawaii, ending many years of service to CFHT. Their departure was marked by a grand aloha party at the home of Mr. Bouvet on August 8. Corporation personnel and friends from the community joined to say goodbye to Roger and Graham and their families. All were treated to a dinner of Hawaiian cuisine and an exhibition of traditional Hawaiian dancing by Edie Radl and Beth Berthoud. This was followed by presentations by our incoming director, René Racine. Each departing director was given a koa wood model of the telescope and oil painting by local artist Helen Cassidy.

Roger Cayrel has returned to his position at the Observatoire de Paris. He reports that at last he is getting on with research that he had to put aside for so long. Graham Odgers has returned to the Dominion Astrophysical Observatory in Victoria. We shall miss them both. The astronomical communities of Canada, France, and Hawaii are deeply indebted to them for their tremendous efforts in bringing the CFH telescope into being.

*At their Aloha party Pam and Graham Odgers and Guisa and Roger Cayrel enjoy a traditional Hawaiian mele.*
