

few suffered from catastrophic technical failures. We stand to be corrected on a few details of the statistics available to us but surely not by a significant amount in the end. Things will, in time, get better. As they stand they don't seem so

very bad for an 18-month old observatory.

Much ado about nothing!

René Racine
Executive Director

Observing Statistics for January through November 1981

The Canada-France-Hawaii Telescope Corporation (CFHT) is a joint organization of the National Research Council of Canada (NRC), the Centre National de la Recherche Scientifique of France (CNRS), and the University of Hawaii (UH).

The CFHT Information bulletin is published in English and French twice a year in June and December. It is distributed free to Canadian, French, and Hawaiian astronomical institutions and to others interested in astronomy.

The text and illustrations of any article may be reprinted if credit is given to CFHT.
